

DURGA BAHADUR SHRESTHA

MERN Stack Developer | IT Support / Computer Technician

Nepal • LinkedIn: [linkedin.com/in/durgashrestha](https://www.linkedin.com/in/durgashrestha) • GitHub: github.com/durgabdrshrestha

PROFESSIONAL SUMMARY

IT Support and Computer Technician with 5+ years of practical experience supporting Windows systems, computer hardware, networking, printers, and end users. Currently developing full-stack web applications with the MERN stack (MongoDB, Express.js, React, and Node.js), including REST APIs, JWT authentication, responsive interfaces, and MongoDB-backed applications. Seeking remote international opportunities where technical support experience and modern web development skills can be combined to deliver reliable technology solutions.

CORE TECHNICAL SKILLS

Web Development JavaScript, React, Vite, Tailwind CSS, HTML5, CSS3, Responsive UI	Backend Node.js, Express.js, REST APIs, JWT, bcryptjs, CORS, Helmet
Database & Tools MongoDB, Mongoose, Git, GitHub, VS Code, Postman, npm	IT Support Windows, Hardware, Networking, Printers, Troubleshooting, End-user support

PROFESSIONAL EXPERIENCE

Computer Technician / IT Support

IT Support • Computer Hardware • Networking

- Provide day-to-day technical support for Windows computers, peripherals, printers, and common user issues.
- Troubleshoot hardware, operating-system, network connectivity, file-access, and device configuration problems.
- Support local network environments, routers/access points, shared resources, and internet connectivity.
- Install, configure, maintain, and troubleshoot computer systems and related IT equipment.
- Diagnose issues methodically, communicate solutions clearly, and restore user productivity with minimal downtime.

Nepal Army

5+ years experiences

SELECTED DEVELOPMENT PROJECTS

CONNECT — Private Real-Time Communication Platform — MERN • Socket.IO • WebRTC

- Full-stack real-time communication application with authentication, profiles, user search, conversations, messaging, media communication, and planned audio/video calling.

Personal MERN Portfolio — React • Node.js • Express • MongoDB • Tailwind CSS

- Production-oriented portfolio with public profile sections, projects, testimonials, contact messaging, social links, resume management, JWT-protected administration, and responsive UI.

MERN Home Rental System — MongoDB • Express • React • Node.js

- Role-based rental platform supporting property management, room discovery, authentication, and multipart property uploads.

Military ID Card Generator — MERN • JWT • CRUD

- Web application for generating and managing military ID cards with structured identity fields, photos, logos, signatures, and verification.

EDUCATION

Bachelor of Computer Application (BCA)

Computer Application

Additional background: +2 Management with Computer Science focus.

2018 – 2022

Nepal

PROFESSIONAL FOCUS

Remote IT Support • MERN Stack Development • Full-Stack Web Applications • REST API Development • Responsive Web Design
• Technical Troubleshooting • Continuous Learning
